

Playing with PERSPECTIVE:

Follow the steps to create a landscape using linear perspective.

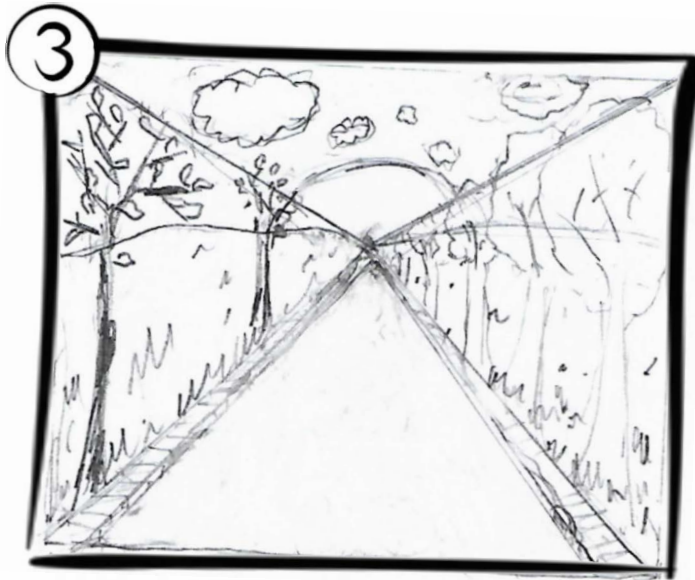

1 Draw a dot for the vanishing point. Place it near the centre of the page

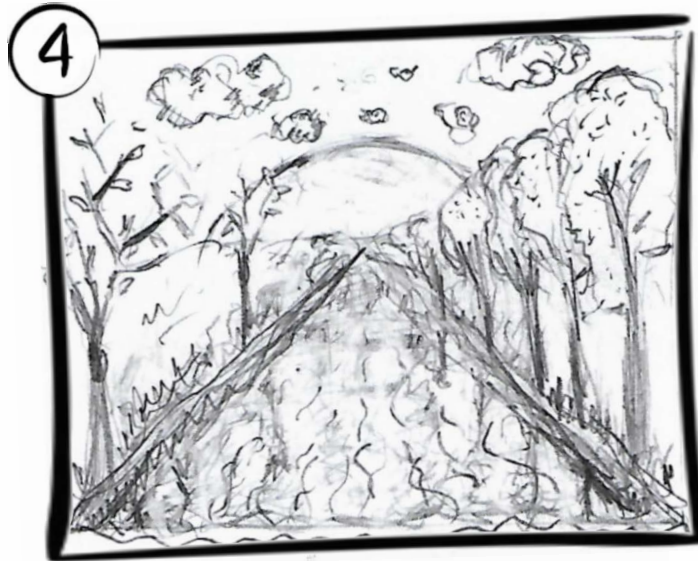

← Add a horizon line that separates the land from the sky.

2 Use a ruler to lightly draw four diagonal lines from the vanishing point to the edges of the page.

3 Use the lines to help add details like trees and clouds to your landscape. Remember the closer things get to the vanishing point the smaller they become!

4 Rub out your diagonal lines, add in a few more details and there you have it, a perspective perfect landscape.

5 You could even try adding pale colours in the background and warm colours in the foreground, just like Rubens!
