

# Playing with PERSPECTIVE:

Follow the steps to create a landscape using linear perspective.

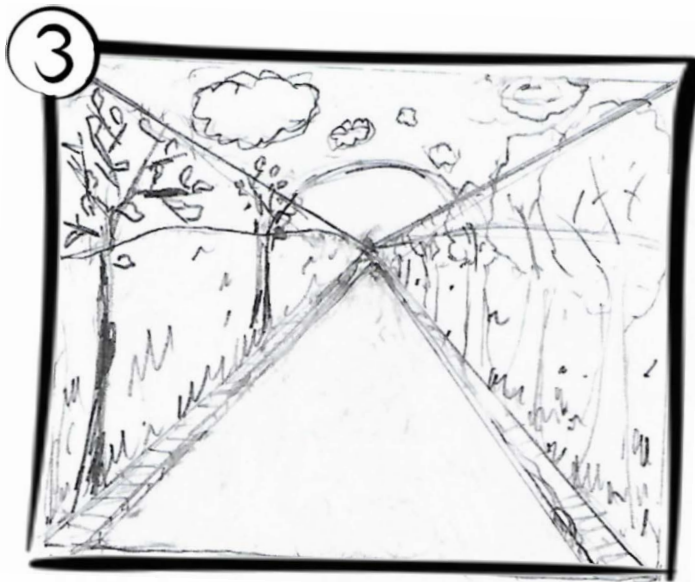

Draw a dot for the vanishing point. Place it near the centre of the page

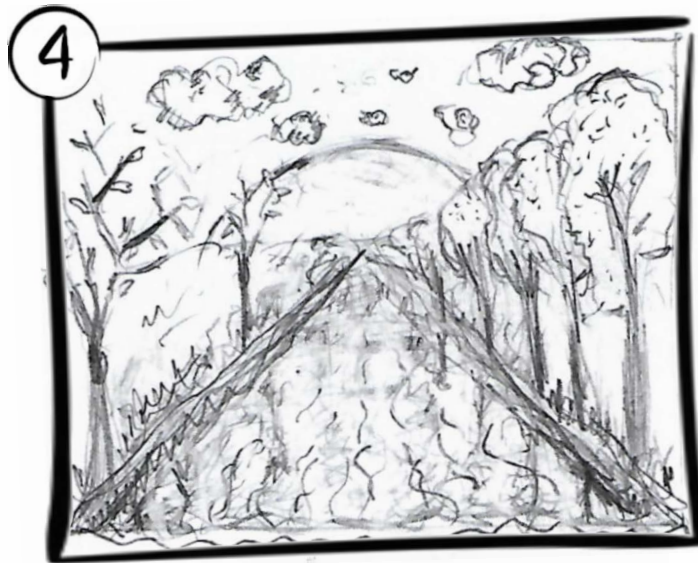

Add a horizon line that separates the land from the sky.

Use a ruler to lightly draw four diagonal lines from the vanishing point to the edges of the page.

Use the lines to help add details like trees and clouds to your landscape. Remember the closer things get to the vanishing point the smaller they become!

Rub out your diagonal lines, add in a few more details and there you have it, a perspective perfect landscape.

You could even try adding pale colours in the background and warm colours in the foreground, just like Rubens!
